1 kgs into grams

```c
#include <stdio.h>

int main()
{
    float kg, grams;

    printf("Enter kilograms: ");
    scanf("%f", &kg);

    grams = kg * 1000;

    printf("%.2f kg = %.2f grams\n", kg, grams);

    return 0;
}
```
